Leverage a full portfolio of sensors and position switches, fully customizable to your requirements : from limit switches and inductive to photoelectric, pressure, ultrasonic, capacitive, RFID, and wiring solutions.

We tailor our solutions to your application needs, such as : cable length, specialized connectors, head and lever configurations, switching threshold adjustments, labeling, packaging, and much more.

A "Simply Easy" adaptation process :

You define your need—we take care of the rest.

The Sensors Adaptation Center (SAC) team manages the entire process for you, working closely with our factories and R&D. We perform a feasibility study, build prototypes, set pricing, and produce the custom product.

Our **Sensors Adaptation Center** combines deep multi-disciplinary expertise and seamless collaboration with Telemecanique Sensors R&D to deliver precisely what your adaptation demands, from simple adaptations to fully custom products.

A "Simply Easy" adaptation process

(*) Prototypes can be developed upon request to validate your solution
